Claims 1-22 are allowable over the prior art of record because none of the prior art of record teaches or fairly suggests using a pulse width modulated signal generator (PWM) for controlling the driver switches of a VCM such that the ripple current flowing through the VCM can be adjusted accordingly during the T_{dead} time interval of the PWM.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
